

FISC Acknowledgment Letter Workflow

FISC receives data file(s). Client can track jobs online throughout processing with FISC View.

A production control ticket is used to ensure quality control.

Files are processed for pre-sort, including reports for the post office. Processed files are verified.

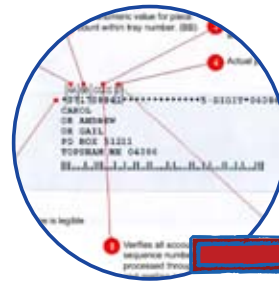

Letters are printed on high speed laser printers.

PDF letters are posted to online archive.

Letters and fulfilment items are processed automated or manually.

Work processed in our automated environment uses JETVision for several quality assurances.

With selective insertion, information on the letter is used to match marketing pieces with specific letters for target marketing.
